- In the market since 2007 with proven track record and reputation through working

Benefits from AHA Trainings

- Today, many of the people feel helpless to act during an emergency because they do not know how to administer CPR or they are afraid of hurting the victim,
- Through AHA Training, the aim is to make & recognize Heroes that have stepped into save a life. You've not only helped save a life within your community; but also partnering with the American Heart Association [AHA] to improve the survival rate of citizens who receive bystander Cardio Pulmonary Resuscitation (CPR),
- Basic Life Support training reinforces Healthcare Professionals' understanding of the importance of early CPR and defibrillation; basic steps of performing CPR; relieving choking; and using an AED; and the role of each link in the Chain of Survival, and
- We're happy to honor anyone who has assisted in any part of our chain of survival, regardless of training or outcome.
